

COURSE PROGRAM

training in design, materials science and new products for teachers
of vocational subjects in the field of tailoring and underwear,
carried out with the use of the latest technologies

Course objectives:

1. Improving the quality of education in the institutions where teachers teach.
2. Implementation of individual teacher development projects.
3. Acquisition of new professional skills in spatial modeling of fancy clothing forms.
4. Execution of clothing models, in which each model is inspired by the creations of 21st century fashion designers.

Methods and forms of work:

1. Activation methods
2. Problem talk
3. Workshop classes

Organization of classes:

1. Workshop activities take place in 6-hour blocks

Evaluation:

Evaluation, which allows you to check whether the intended objectives have been achieved will take place on several levels:

- ✓ preliminary surveys
- ✓ final survey.
